Walls are assumed to be offset perpendicular to each other during design. The offset distance is provided as a reference distance based on the possibility of needed site adjustments during construction.

**Infilled Soil**

TERRACED WALL SECTION

**Construction Note:**

Overall height of terraced structure is the sum of the heights of the individual walls plus any adjustments between walls where allowed by the engineer of record.

During wall layout, when the top of the wall is controlling in height and location, adjustments can be made in the terraced heights or the spacing(s) between walls.

**Allan Block Units**

The purpose of this drawing is for preliminary design only. This drawing should not be used for final design or construction without the certification of a professional engineer registered in the state in which the wall will be built. The accuracy and use of details contained in this document are the sole responsibility of the user. The user must verify each detail for accuracy as they pertain to their particular project.
