AB Contractor Certification Fence Program

The Allan Block Fence Contractor Certification Program is designed to give contractors the proper training and tools to ensure top quality AB Fence Systems are built. As a leader in the industry, Allan Block Corporation has developed these tools and training programs to help contractors get the knowledge and the resources they need.

With the help of our vast network of trained Allan Block representatives, thousands of professionals have already taken advantage of our installation training, technical support, and the many tools we have available to help them plan, design and build with Allan Block products. This three-stage program blends the details of wall design and the experience of wall construction to help us define each contractor's individual level of ability and service. This on-going certification program has also helped us provide a better understanding of how and why stackable structures work so well.

Working through the levels of the Allan Block Contractor Fence Certification Program, we will show you why training can be your best resource for high quality engineered wall construction.
