There are numerous ways to ensure your retaining wall project is successful. One of the most important is having the proper quantity of materials delivered to the jobsite. Accurately estimating the materials for your project is not always easy, especially when you have to consider different wall lengths and heights, the multiple block types and patterns, changing elevations, geogrid types and lengths and the amount of rock in the base and behind the wall. Here are a few tips to help:

1. It is crucial to have an understanding of how Allan Block retaining walls are installed prior to estimating a project.
2. Always make a site visit. This is the only way to know if the design and plan for the project accommodates the site conditions. You will also need to look at where you are going to stage your materials and maintain access to the site.
3. Develop a procedure to calculate your quantities and be consistent. Allan Block has created estimating tools to assist with this.
4. Double check your estimate. Use your experience and knowledge to evaluate your estimate. You should have a rough idea of what the quantities are before you obtain your results from any estimating tool.

Check out our latest tool. Easily estimate materials for walls over 6 ft. (1.8 m) in height!

The Allan Block Commercial Wall Estimating Tool makes it quick and easy to determine the amount of materials you will need for projects over 6 ft. (1.8 m) in height. This Microsoft Excel based estimating tool can be downloaded from allanblock.com to make estimating on your next project quick and easy!

Estimate projects that use one block shape or multiple shapes when building patterned walls.
Design up to 4 walls on a project with varying heights and conditions at the same time.
Inputting site and soil conditions of the project will estimate the grid quantities that are needed.
Customize the tool by adding in labor and exact material costs to get an accurate cost of the project for help in bidding.
If your project is a simple residential wall 6 ft. (1.8 m) in height or less, we also have a quick and easy estimating tool similar to this commercial tool.

In their new Centennial, Colorado, home, the Brock family found the challenge of turning their backyard from one big hillside and turning it into an exotic retreat that they could enjoy for years to come.

With neighbors sitting much higher all around them, the Brock’s needed a way to turn their slopes into more usable space. They also wanted to be able to bring the feel of their surroundings into an exotic retreat that they could enjoy for years to come.

“We are so happy, we love the way the walls have opened up the space. Now we have Cabo San Lucas right here in our own backyard!”

The allanblock.com website is packed full of everything you need to plan, design and build with Allan Block products. From our retaining wall collections to our patio wall system as well as our AB Fence System, which is a great product for screening and sound barrier applications, you can find a solution to make your site more usable.

The site is conveniently separated into four main customer categories that lists the popular topics for each category first:

- Homeowners
- Residential Contractors
- Commercial Contractors
- Architects, Engineers, and Building Officials

With over 600 pages of information available at your fingertips, you will be able to find what you need quickly.

Installation

Also available at allanblock.com or in print format is our complete installation guide for Landscape Walls. This piece covers everything you need from getting started to numerous types of finishing options for your project. Quickly see how to build straight, curved or terraced walls, step ups and downs, lighting, water applications, reinforcement and much, much more. Also available in Spanish.

Once you have the basics of installation mastered, you can then download and use our estimating tool to determine the necessary materials you will need to complete your project. By entering in the specification of the project you can print out a complete material list that includes your block quantities, base and wall rocks, gravel, capstone, drain pipe and adhesive that will be needed.

Photos and Installation Videos

Easily navigate through our vast selection of project photos for each of our products. Broken down into popular applications, you can page through and see several photos that will give you great ideas of what you can do with Allan Block.

We also have a full library of installation videos available to see how to plan, design and build your next Allan Block project. Quickly learn how to build the correct way and build your next Allan Block project.

Where To Buy/Colors/Availability

Now that you have browsed the site, check out the Where To Buy section to see exactly what products are available from your local dealer as well as what colors they come in.

Training and Certification

The Allan Block Contractor Certification Program is designed to give you and your staff the proper training and tools to ensure top quality retaining walls are built. As a leader in the industry, Allan Block Corporation has developed these tools and training programs to help contractors get the knowledge and the resources they need.

With the help of our vast network of trained Allan Block Representatives, thousands of professionals have already taken advantage of our installations training, technical support, and the many tools we have available to help them plan, design and build with Allan Block products.

Once you have become a Certified Allan Contractor, you are then eligible for our AB Rewards program for all sales with the Allan Block products.

To find out more about upcoming training or the AB Rewards, visit allanblock.com or contact your local AB Representative today.
Unruly Hillside Turned Vacation Retreat

In their new Carbonado, Colorado, home, the Brock family faced the challenge of turning their backyard into an exotic retreat that they could enjoy for years to come. With neighbors sitting much higher than them, the Brock’s needed a way to turn their slopes into more usable space. They also wanted to have their favorite place, Cabo San Lucas, to be able to bring the feel of their slopes and created seating areas for a short work of the construction process and the Brock’s needed to have access to the site and with their cooperation, the contractor was able to access the site and began work on the project. The contractor had to get started on the project, the contractor had to address the biggest challenge on the site, little to no access. After surveying the area and identifying the slope, it became apparent that they would need to get approval to get into the site. The surrounding neighbors were contacted and the contractor had to access the site from the adjoining properties. It seemed to be exactly what the customer was looking for. The Brock’s had used Allan Block on several other projects and the site turned out, “We are so happy, we love the walls have opened up the space. Now we have Cabo San Lucas right here in our own backyard!”

The Brock’s - homeowners

There are numerous ways to ensure your retaining wall project is successful. One of the most important is having the proper quantity of materials delivered to the jobsite. Accurately estimating the materials for your project is not always easy, especially when you have to consider different wall lengths and heights, the multiple block types and patterns, changing elevations, geogrid types and lengths and the amount of rock in the base and behind the wall. Here are a few tips to help:

1. It is crucial to have an understanding of how Allan Block retaining walls are installed prior to estimating a project.
2. Always make a site visit. This is the only way to know if the design and plan for the project accommodates the site conditions. You will also need to look at where you are going to stage your materials and maintain access to the site.
3. Develop a procedure to calculate your quantities and be consistent. Allan Block has created estimating tools to assist with this.
4. Double check your estimate. Use your experience and knowledge to evaluate your estimate. You should have a rough idea of what the quantities are before you obtain your results from any estimating tool.

Check out our latest tool. Easily estimate materials for walls over 6 ft. (1.8 m) in height!

The Allan Block Commercial Wall Estimating Tool makes it quick and easy to determine the amount of materials you will need for projects over 6 ft. (1.8 m) in height. This Microsoft Excel based estimating tool can be downloaded from allanblock.com to make estimating on your next project quick and easy!

- Estimate projects that use one block shape or multiple shapes when building patterned walls.
- Design up to 4 walls on a project with varying heights and conditions at the same time.
- Inputting site and soil conditions of the project will estimate the grid quantities that are needed.
- Customize the tool by adding in labor and exact material costs to get an accurate cost of the project for help in bidding.

If your project is a simple residential wall 6 ft. (1.8 m) in height or less, we also have a quick and easy estimating tool similar to this commercial tool.

Tips for Estimating Materials for Commercial Jobs

Benefit from Allan Block Training

Step 1 -
To become a Level 1 Certified AB Contractor, you must attend an Allan Block Contractor Certification Training Course. This course covers the following topics:
- The advantages of the Allan Block product line
- How Allan Block products work
- Basic principals of wall design
- How Allan Block and geogrid reinforcement work together
- Basic design methodology
- Why walls fail
- AB Wall 2007 software, outputs and wall estimating tools
- Proper methods for constructing an Allan Block wall
- Complete a written test on building walls with AB products
- Participation in a hands-on workshop to learn some of the finer points of wall installation.

Step 2 -
Once Step 1 has been completed, the next step is for you to build an Allan Block wall that has a minimum height of 3 ft (0.9 m) and is a minimum of 300 units (full size or equivalent).

Step 3 -
On completion of your wall project, notify your local All Sales Rep. so that they can submit the appropriate paperwork to Allan Block Corp. to receive your Allan Block Certified Wall Installer Certificate and rewards.

Ask your local All Sales Rep. how to qualify as an Experienced or Master Wall Builder.
